Protecting you from the biggest risks you’ll face

Serious illness cover
Important Note - Please read
Zurich’s Serious Illness Cover is subject to terms and conditions which are contained in the policy document. It is important to note that not all serious illnesses are covered under this policy. In order to make a valid claim policy specific conditions must be met and certain exclusions apply. You should refer to the policy document which is available on request from Zurich.
Serious illness – the bigger risk?

You probably consider dying to be one of the biggest risks you’ll face. And to protect your family you might have life insurance in place. If you do, it’s a great first step. If you die within the term of your cover, you are covered. If you don’t die, you are not covered. It’s as simple as that.

Unfortunately, life isn’t that simple.

While death comes to us all, it’s serious illness that perhaps is our biggest risk. In fact, you are much more likely to suffer from Cancer, a Heart Attack, or a Stroke before age 65 than you are to die.*

And what if you do become seriously ill and you can’t work? What if you find yourself struggling financially at a time when money should be the last thing on your mind?

That’s why you should have serious illness cover.

Serious illness – a bigger risk than death?

Before age 60 the risk of suffering a serious illness is much greater than the risk of dying. And as you get older, that risk increases dramatically.

Source: Brett & du Toit (2007) A Critical Table - Pricing Critical Illness in the UK on a New Insured Lives Table. The figures shown are the number of male (non-smoker) deaths & serious illnesses that occur per 10,000 people in the UK.

At 50, you are 4 times more likely to suffer a serious illness than die.
If you do suffer a serious illness – what could you rely on?

### Sick-pay
Firstly, you should check with your employer to see what sick-pay arrangements they have in place. You could be surprised at how generous (or how poor!) some sick-pay arrangements are.

### Existing cover
You should also review what cover you already have in place – are you familiar with the terms of your existing policies? Check with a financial broker or advisor if you are unsure.

### Savings
Consider the savings you have. Ask yourself how much you need to spend every month and work out how long your savings could last. Unfortunately for many Irish people, their savings may not last as long as they hoped.

### Why consider serious illness cover?

It pays out a cash lump sum if you get one of the many serious illnesses covered by the plan – illnesses such as **Cancer**, a **Heart Attack**, or a **Stroke** (subject to policy terms and conditions).

A cash lump sum can help remove some of the financial and emotional stress associated with a serious illness – to enable you to take the time off work, to help pay for specialist treatment or even to help cover day-to-day household bills such as childcare.

If you think that serious illness could put you or your finances at risk, then you should speak to a financial broker or advisor.
Even a small amount of serious illness cover can go a long way. If you needed €2,500 every month (€30,000 in a year) to cover your household expenses, the good news is that it doesn’t have to cost the earth. The table below shows how far even a small amount of cover could go and the monthly cost.

Funding for your current lifestyle

Number of years the lump sum payout would fund.

Source: Zurich Life, August 2016. Based on 40 year old non-smoker with serious illness cover for a term of 20 years. A government insurance levy (1% as at August 2016 and may change in the future) applies to this policy. These sample premiums do not include this levy.

Funding your household expenses for 2 years could cost as little as €29.73 per month*.

*Based on providing cover for monthly expenses of €2,500 over 2 years.
But it’s important that you don’t delay

All forms of life insurance cost more the older you get, and serious illness cover is no different. The longer you leave it, the more it will cost you.

The younger you are, the less it costs

Source: Zurich Life, August 2016. Based on non-smoker with €50,000 serious illness cover for a term of 20 years. A government insurance levy (1% as at August 2016 and may change in the future) applies to this policy. These sample monthly premiums do not include this levy.

In 2015, over 65% of Zurich’s female serious illness claims were for women under age 50.
Why choose serious illness cover from Zurich

We provide cover for 70 serious illnesses including the three most common: Cancer, Heart Attack and Stroke. In fact, in 2015 these three illnesses accounted for over 80% of all our claims.*

Also, we think our Cancer, Heart Attack and Stroke definitions are the strongest in Ireland. What this means is that we expect to pay out on more of these claims than anyone else – so you can have peace of mind that you are covered with Zurich.
