INVESTMENT OBJECTIVE

The investment objective of the World Allocation 60/40 ("Fund") is to achieve long-term total return. The fund is managed on a discretionary basis and is a "fund of funds" which means that it mainly invests in other investment funds, but may also invest directly in shares and debt. A fuller statement of the investment policy is available in the prospectus and KIID and/or KID, as applicable.

PRINCIPAL RISKS

Investing involves risks such as loss of principal and fluctuating value. The investment return may be affected by the following factors: Investing abroad may include international risks such as political and economic risks. Emerging markets may be subject to greater liquidity, political, settlement and custodial risks than developed markets, amongst others. Smaller companies can be subject to greater volatility and liquidity risks than larger companies. Value investing is subject to style specific risks and may, at times, underperform the broad market. Bonds may be subject to losses when yields rise as well as other risks including changes in credit quality and liquidity. Derivatives, if used, can be subject to risks such as leverage, market, counterparty, liquidity, interest rate and credit risks. They may be used to hedge risks, such as currency fluctuations, but their effectiveness is not guaranteed. Potential investments in other funds may affect performance, costs and risks. For more information on risks related to an investment in a fund, please see the corresponding KIID and/or KID, as applicable, and the Risk section of the Prospectus.

ANNUALISED PERFORMANCE (%)

The following information is additional to, and should be read only in conjunction with, the performance presented above.

Performance for the fund is reported net of fees. Performance less than one year is not annualised. Performance information is provided by Dimensional Fund Advisors, as of the date of the material unless otherwise specified. To obtain performance data current to the most recent month-end, visit dimensional.com. Average annual total returns include reinvestment of dividends and capital gains. The index is not available for direct investment, therefore its performance does not reflect the expenses associated with the management of an actual fund. The Fund is actively managed and is not managed in reference to a benchmark. The index is used for comparative purposes only. **Current performance may be higher or lower than the performance shown. Performance may increase or decrease as a result of currency fluctuations. The investment return and principal value of an investment may fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original value. There is no guarantee strategies will be successful. Diversification neither assures a profit nor guarantees against loss in a declining market.**
