

# Sustainability related disclosures for Zurich's Financial Planners

## **Information on policies on the integration of sustainability risks into the investment decision-making process and how we consider the adverse impacts of our investments on sustainability factors**

Zurich's Financial Advisors provide advice to you on suitable insurance products, taking account of your personal circumstances, financial situation and your needs and objectives.

The financial advice provided by Zurich's Financial Advisors does not currently consider the principal adverse impacts of investment on sustainability factors in the advice provided. Sustainability risks and the likely impact of sustainability risks on product returns are not integrated into the advice process. This is because the only insurance products which we can provide you with advice on are those provided by Zurich.

Zurich, as product provider, publishes information on how Zurich take account of the impacts of investment decisions on sustainability risks. This information is available [here](#).

## **Transparency of remuneration policies in relation to the integration of sustainability risks**

The remuneration policy implemented by Zurich is consistent with the integration of sustainability risks including regular evaluation of whether the remuneration architecture does not encourage any inappropriate risk taking.
