

Volatility is to be expected – don't let it derail you!

In life, every year is not without its ups and downs and investment markets are no different. Investors should be aware that markets can have a bad week, month or even a year. However, history suggests that those who stay the course will find they are much more likely to benefit as opposed to those who don't.

The table below shows the wide spectrum of yearly returns from one of Zurich's longstanding funds, the Balanced Fund.

2003 12.0%	2004 12.0%	2005 23.5%	2006 14.4%	2007 0.8%

*Annual management charges (AMC) apply. The fund returns shown are net of the AMC deducted by Zurich Life in our unit prices. The fund returns are based on an investment in the funds and do not represent the returns achieved by individual policies linked to the funds. These fund returns may be before the full AMC is applied to a policy. The actual returns on policies linked to the specified fund will be lower because of the effects of charges and in some cases a higher management charge.
