

Advice Personal Retirement Savings Account

List of available Collective Investment Vehicles

The Personal Portfolio Fund option allows you to select your own shares. This fund is created and personalised for you and facilitates access to direct equity investment. It is designed for contributors that want more flexibility and control over the assets backing their PRSAs. You have significant control over the assets in the fund by determining what securities and bonds the fund should hold; there are some restrictions, however, on what securities and bonds the fund can hold, and details of these restrictions are available from us on request. You deal directly with a stockbroker and have access to experienced staff and their research capabilities.

As well as investing in stocks and shares, you can choose to invest in Collective Investment Vehicles through the Personal Portfolio option. You may only choose from the Collective Investment Vehicles listed here, and this is also subject to your stockbroker being able to facilitate a trade in the relevant fund. Changes to this list must be requested from Zurich Life. If you choose to invest in funds, then the normal management and other charges deducted within those funds will apply. These charges are in addition to the PRSA contract charges levied by Zurich Life.

The table below sets out the total expense ratio for each available fund, based on the information published by the relevant fund manager. This charge is in addition to the annual management charge deducted by Zurich Life. The information shown below is the latest available to Zurich Life as at July 2020.

Zurich Life is not responsible for the actual charges deducted from each fund, and you should check the details of each fund carefully to understand the charges which can be levied. Full information on all of these Collective Investment Vehicles is available from the relevant fund manager.
