Markets finished the week relatively flat, bolstered by technology sector stocks, with the consumer staples and healthcare sectors lagging. With almost a quarter of S&P 500 companies having reported earnings so far, profits are up 13% and earnings estimates are still forecast to grow 6% in 2019. Since 1955, in years when corporate earnings grew by at least that amount, the stock market rose 83% of the time. On the economic front, the data remains mixed. Initial jobless claims in the U.S. fell below 200,000, the lowest since 1969. The unemployment rate remains near a 50-year low and the labour market remains solid. However, the IMF did cut their 2019 global growth projections from 3.7% to 3.5%. In China, growth fell to 6.6%, the lowest rate since 1990. Meanwhile, in Europe, the German IHS Markit manufacturing purchasing managers index fell into contraction, dropping to 49.9 in January.
