

# European Central Bank holds interest rates steady

In the US, equities experienced volatile trading conditions last week. An early week rally pushed markets to new highs, but gains faded by the end of the week, driven by weakness in the tech sector. The major indices ended the week mixed as markets saw strong sector rotation. Retail sales in June remained flat, countering fears of a decline and showing how the American consumer continues to spend despite signs of a slowing US economy. This follows from a 0.3% increase in May, revised from an initially reported 0.1%. The yield on the US 10-year Treasury bond spiked on Friday in reaction to the widespread global disruption to computer systems, impacting flights, banking services and many businesses around the world, caused by a security flaw in some of Microsoft's operating systems.

The European Central Bank (ECB) maintained its key interest rates at 3.75%, as anticipated. The ECB stated it would not commit to any specific rate path, emphasising that its decision would be data driven. Data released on Wednesday showed that the eurozone's annual consumer inflation rate, as measured by CPI, in June eased to 2.5%, matching initial estimates and down from the 2.6% recorded in May. Core inflation, which excludes volatile food and energy prices, remained steady at 2.9% in June compared to the previous month.

Annual headline inflation in the UK remained steady at 2% in June, partly due to a significant decline in energy costs. Core inflation also held steady at 3.5% and services inflation, which is closely monitored by policymakers, also remained at 5.7%.

Japanese equities declined over the week, with the Nikkei 225 index dropping due to speculation about a potential interest rate hike by the Bank of Japan at its upcoming July meeting. Markets were also impacted by fears of reports that the US is looking to impose tougher semiconductor trade restrictions on China.

## Fact of the Week

18 of the 23 biggest equity markets have hit all-time highs in the first half of this year.
