

Monthly Investment Review

Rising new coronavirus cases and renewed lockdowns, which pose a risk to the ongoing economic recovery, resulted in equities declining for the second month in-a-row in October. However, policy stimulus should remain on the frontline of defence for the global economy, and lockdown measures are being calibrated to minimise economic fallout. Additionally, the development of vaccines against COVID-19 seems to be making good progress and recent positive news in this regard has added optimism to markets. The US Q3 earnings season showed profits for tech firms that were above expectations, but their outlook was more downbeat than investors anticipated. While market volatility will remain high on the back of rising virus cases, there is a potential upside for equities. A step-up in fiscal and monetary stimulus in the face of a deteriorating economic outlook should support equity prices. The US election results removed some unknown factors with a split Congress, seen by many as beneficial, the most likely outcome.

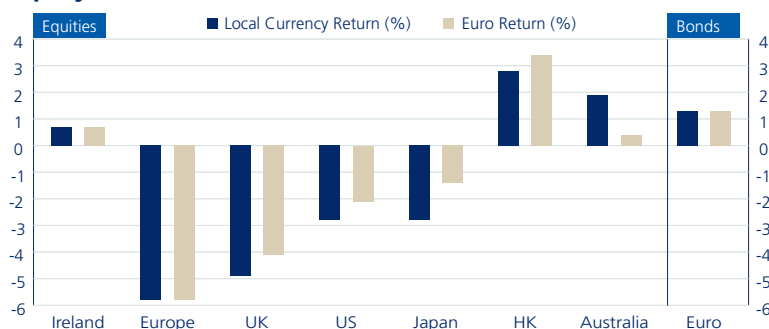

Richard Temperley
Head of Investment
Development

Activity

Equity positions in our multi-asset funds were unchanged during October and remain well above benchmark. Our short-term strategy is to buy on dips. With regards to geographic positions, the main bias is towards Asia, Japan and Europe. The US is now a slightly underweight position following a particularly strong run. Sector-wise, the funds are positively biased towards technology and consumer discretionary stocks and negatively biased towards consumer staples, utilities and energy. Bond positions are below the middle of ranges whilst the duration of these bonds is below benchmark. Corporate bonds have been increased at the expense of sovereign bonds over the last number of months.

Equity & Bond % Returns: October

This graph shows the performance of the major equity markets over the month of October. The returns are shown in both local and euro currencies. The bond index is the Merrill Lynch Over Five Year Euro Government Bond Index.

MARKET PERFORMANCE

Equity Markets

World equities (in euro terms) fell by 2.4% in October giving a total return of minus 5.0% for the first ten months of 2020. Local currency returns in October for the major markets ranged from plus 2.8% in Hong Kong, helped by stronger Chinese economic data, to minus 5.8% in Europe. The influential US market fell by 2.8%. Euro returns in overseas markets have been hindered in 2020 by the strength in the euro currency although there was a slight reversal of this trend during October. Regarding sectors in the US during October, the strongest returns came from utilities (+5.0%) and consumer services (+0.5). Technology (-5.2%) and energy stocks (-4.7%) were the clear underperformers. Year-to-date, technology (+21%) and consumer discretionary stocks (+19%) have been the best performing sectors; energy the worst, down 53%.

Bonds & Interest Rates

The Over Five Year Euro Government Bond Index rose by 1.3% in October, in a more risk-off environment, giving an impressive return of plus 6.9% for the first ten months of the year. The German ten-year bond yield fell in October moving from minus 0.52% to minus 0.63%. This remains a most unusual situation and means that buying German bonds today guarantees a loss if held to maturity. Equivalent US rates rose from 0.68% to 0.87%. They had begun the year at 1.92%. The Federal Reserve and other central banks have introduced a wave of liquidity over the last number of months, which has included various forms of asset purchases, to support economies and businesses.

Commodities & Currencies

October saw overall commodity prices fall by 2.5% and they are now down 22.1% so far this year, the main culprit being oil. Oil prices fell by around 9% in October and they are now down by around 42% so far this year due to concerns over slowing economic growth and geopolitical tensions. The gold price fell by 0.4% during the month, to \$1,880 per troy ounce, but is up by 23.4% in the first ten months of the year. The copper price was virtually unchanged on the month. The euro currency weakened slightly during October against the US dollar with the EUR/USD rate moving from 1.17 to 1.16. The rate began the year at 1.12.

Annual management charges (AMC) apply. The fund returns shown are net of the AMC deducted by each provider in their unit prices. This will vary for each provider, and any difference will impact the relative performance of the funds shown. The fund returns are based on an investment in the funds and do not represent the returns achieved by individual policies linked to the funds. These fund returns may be before the full AMC is applied to a policy. The actual returns on policies linked to the specified fund will be lower because of the effects of charges and in some cases a higher management charge.

* Performance using most recent data available.

Figures highlighted in beige indicate where the Zurich Life fund has outperformed the sector average.
