Fund Description

Indicative equity exposure: 100% of the value of the fund.

The Indexed India Equity fund is a unit-linked fund that gives you the opportunity to share in the performance of companies in India's economy. The fund currently invests in an Exchange Traded Fund (ETF) managed by Lyxor. The Lyxor ETF is passively managed and aims to track an index indirectly using derivative instruments. The ETF may not always track the index due to a number of factors including time lags and costs of reflecting changes in the index. Zurich Life reserves the right to replace this ETF with another fund at any stage. As the underlying index is priced in rupees, a currency risk arises for a euro investor. This unit-linked fund is denominated in euro. The unit-linked fund can have exposures to cash as part of the management of the fund.
