

January 2025

# SuperCAPP

A Unitised With-Profits Fund.

# SuperCAPP into 2025

The SuperCAPP fund was launched in 1978 and has been closed to new business since 2021.

## The Annual Dividend

Annual Dividends aim to provide policyholders with a steady accumulation of investment return from year to year that is broadly consistent with prevailing medium-term interest rates. The relationship between the SuperCAPP Annual Dividends and end of year medium-term interest rates over the past 10 years is illustrated in the below graph. The Fund closed to new business in 2021. The fund is only accepting inflows from existing customers in very limited circumstances.

SuperCAPP Annual Dividend

■ Annual Dividend ■ 10-Year Bond Yield

Source: Zurich Life, January 2025

The interim Annual Dividend for 2025 has been increased to 2.50%. The declared Annual Dividend for 2024 is unchanged from the 2024 interim Annual Dividend of 2.00%.

Policy Type	Annual Dividend	
	2025 Interim	2024 Declared
SuperCAPP Personal Retirement Savings Account (PRSA) Fund (For all issued PRSA plans)	<b>2.63%*</b>	<b>2.11%*</b>
SuperCAPP Fund (For pension and gross roll-up saving and investment plans issued since November 1998)	<b>2.50%*</b>	<b>2.00%*</b>
AutoMetric SuperCAPP (For AutoMetric SuperCAPP plans issued between 1981 and 1998)	<b>2.50%*</b>	<b>2.00%*</b>
SuperCAPP (For SuperCAPP plans issued between 1978 and 1982)	<b>1.75%</b>	<b>1.25%</b>

\*Annual management charges (AMC) apply

## Minimum Annual Dividend Guarantee

Annual Dividends are distributed via the change in the daily unit prices and this is offset by the element of management charges deducted through the unit price. Some policyholders have a Minimum Annual Dividend Guarantee most commonly stated as a guarantee that unit prices cannot fall. The minimum Annual Dividend for these policyholders is the element of charges deducted through the unit price.

The impact of the Minimum Annual Dividend Guarantee applying is that higher Annual Dividends will be distributed to policyholders with the guarantee and this will be offset by lower Special Dividends for these policyholders.

## Special Dividends

Special Dividends may also be paid on withdrawal of money invested in the Fund for five or more years. Policies investing in the Fund are grouped into Cohorts of similar policies for the purpose of calculating Special Dividend rates. These Cohorts aggregate policyholders into bands based on year of entry into the Fund, premium frequency of their policy (single and regular premium) and product type (e.g. PRSA policies have separate Cohorts to non-PRSA policies). The Special Dividend reflects the actual investment return achieved by the Cohort in excess of the amount already distributed through Annual Dividends.

## Market Level Adjustment

In certain circumstances, such as a period of sustained negative market returns to the portfolio, encashment values may be reduced by the application of a Market Level Adjustment. A Market Level Adjustment may be applied to the entirety of the Fund or to one or more Cohorts of the Fund.

## With-Profits Operating Principles

Further information regarding the principles that are used to manage the SuperCAPP fund can be found in the SuperCAPP With-Profits Operating Principles document. This is available online on the Funds section of our website ([www.zurich.ie/with-profits](http://www.zurich.ie/with-profits)).
