American Select Fund (Columbia Threadneedle)

Risk Rating

The Fund has a risk rating of 6. Please see the Fund Guide for more details.

Fund Description

Indicative equity exposure: 100% of the value of the fund

The American Select Fund (Columbia Threadneedle) aims to achieve growth through capital gains and income by investing in companies domiciled in North America or which have significant North American operations. There will be no particular sector specialisation. The 'Select' investment approach means that the fund has the flexibility to take significant stock and sector positions which may lead to increased levels of volatility. The fund has a concentrated portfolio which leads to increased levels of stock specific risk. On occasion, the fund may invest in fixed interest securities and money market instruments, when deemed appropriate. This fund invests some of its assets outside the eurozone so a currency risk arises for a euro investor. This fund is managed by Columbia Threadneedle.
